Common PSE and Svk statement regarding SIDC (XBID) activation on PL- SE border

Following the information provided with SIDC press release, issued on 18th Nov 2019, in terms of “inactive” status of PL-SE border, PSE and Svk inform that the issues have been resolved and the tests required for switching the status of the border to “active” have been accomplished on 15th January 2020. As a result of the above, SIDC Operational Committee (OPSCOM) approved the decision on the 16th of January 2020 and it today been finally approved to switch the PL-SE interconnector into “active” mode which results in launching SIDC on PL-SE border. Requested date of SIDC activation on PL-SE interconnector is 21st January 2020 (with 22nd January 2020 as a first delivery day).
